

CATTANI COSMETIC

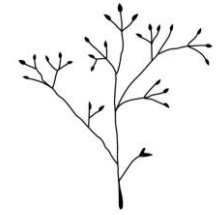

Natural cosmetics according to Dr. Paul Cattani, founded 1919

Why CATTANI COSMETIC ?

In contrast to industrially produced cosmetics, natural cosmetics from the manufactory are characterised by the following points::

1. The use of few, but purposefully and carefully selected raw materials
2. Natural cosmetics are made from skin- and environment-friendly raw materials such as plant oils and fats, plant tinctures and flower waters (hydrolates)
3. Guaranteed without paraffins and petroleum derivatives
4. Whenever possible, raw materials from organic cultivation or wild collection are used without endangering wild stocks
5. Where natural raw materials are threatened, we look for alternatives.
6. Everything is easily degradable
7. Natural cosmetics support the natural functions of the skin and protect it from external influences.
8. No animal testing is used in the production of natural cosmetics.
